PROJECTS

PanLove - paigeelizabeta.com/PanLove/php/homepage.php

May 2026

- Collaborated with two students to create a fully functional social media website using HTML, CSS, PHP, SQL, and JavaScript for the GCSU Panhellenic Council.
- Created a database using MySQL to store user's profiles, posts, likes, and comments.
- Features include the ability to create an account, create a post, like and comment on other posts, view fellow sorority members, view announcements, and create or RSVP events.

Personal Website - avaesme.com

February 2026

- Created a custom, personalized website using HTML and CSS that met specific requirements.
- Utilized AI tools to edit existing elements and add more interactive features.

Human Verification Test

April 2024

- Collaborated with a randomly assigned partner to develop a program of our choosing with specific requirements.
- Delegated tasks and met requirements efficiently and completely.
- Developed a program to distinguish between human users and robots before entering another program, inspired by the reCAPTCHA test.
- Created a custom GUI that met GUI component requirements.

WORK EXPERIENCE

Georgia College & State University, Milledgeville, GA

October 2025 - Present

Information Technology Service Desk Student Assistant

- Provide walk-in services to students, faculty, and staff with a variety of software, hardware, and network issues.
- Monitor and respond to work orders in a timely manner to ensure customers' requests are met and problems are resolved.
- Answer phone calls and provide instructions to callers and/or connect them with a department or staff member that can provide the assistance they require.
